For release 8/2024

Texzon Utilities, a leader in the energy marketplace with over 20 years of experience, and in conjunction with Entergy, a Fortune 500 company that powers life for 3 million customers through their operating companies in Arkansas, Louisiana, Mississippi and Texas, Correlate Energy, a portfolio scale renewable energy provider, and Martin Construction Resources have announced a strategic partnership with Shamsie Farms to develop onsite power generation, renewable natural gas (RNG), and biochar. Shamsie Dairy in conjunction with Prairie Farms is an innovative technology-based dairy that applies robust energy and waste management advancements to create additional revenue streams while exceeding established environmental goals within the industry.

The collaboration between Texzon Utilities and Shamsie Farms aims to revolutionize onsite power generation, waste to energy and decarbonization by harnessing the operational values of various energy technologies. These technologies include manure solutions and waste biodigesting; renewable natural gas production derived from waste, and commercial PV solar.

Texzon Utilities' extensive industry expertise and Shamsie Farm's innovative approach make them ideal partners for this venture. With their combined knowledge and resources, they are poised to make significant advancements in the field of decarbonized onsite power generation, natural gas, and biochar production.

This partnership holds great promise for the dairy industry, stakeholders, and the general public. By leveraging new energy technologies, Texzon Utilities, with Shamsie Farms and our valued partners are paving the way for a cleaner and more sustainable future.

Texzon Utilities' position as an industry leader in the energy marketplace sets the stage for groundbreaking advancements for onsite power generation in the agricultural marketplace. The company's track record of success and expertise in the field will undoubtedly drive the collaboration with Shamsie Farms to new heights.

Shamsie Farms, as the first of a new generation of technology-based dairy companies, brings a fresh perspective to the table. By applying advanced technologies to standard milk production, they are able to unlock new operational byproducts for profitability, energy generation, grid resiliency, and set the gold standard for sustainability within the industry.

Texzon Utilities is excited to embark on this journey together. Our shared commitment to innovation, profitability, and sustainability will drive the development of onsite and waste to energy gas and power generation. This partnership represents a significant step forward in the quest for cleaner and more efficient energy, biowaste and wastewater solutions.

With the launch of this strategic partnership, Texzon Utilities and Shamsie Farms are leading a paradigm shift in the dairy and energy industries. Their collaborative efforts in developing onsite power and gas generation will not only benefit the companies involved but also the entire energy sector and the dairy environment as a whole. By embracing new technologies and working together, they are shaping a more sustainable future for generations to come.
